

I previously submitted a comment on this proposal. I noticed that some of my comments were cut off. Additionally, today I could not even read them with my browser. I hope you can refine this system it is very convenient to be able to submit comments online.

Now to my additional comment. I stated previously I support the ARRL Proposal on Lisence Structure reform. I do have one point of departure. I would like to see the names of the classes of licenses remain, rather than the A, B, C, D class names. I also, believe this would be simpler to implement because you would not have to update name fields in your data base.

I know this is a controversial topic. Good luck in your decision making process!
