

I object to the government spying on American citizens! Unless the government agent/agency has a court order to authorize a wire tap, they should not be allowed to do it and should be imprisoned for it. Also, the government should not try to police the internet! All manner of "gastapo-police" acts have already been committed, by the government under the guise of "protecting children" and "fighting crime." What this country needs is "LESS RESTRICTIONS AND LESS GOVERNMENT NOT MORE!" "WE THE PEOPLE" ARE NOT THE ENEMY!

So please get out of our hair. Don't tap our phones. Don't read our mail. And, Don't track us using our phones.
