

Dear FCC,

I more less agree with the restructuring plan for part 97 amateur radio. I do feel to comment that the morse code requirement should be eliminated. If we must have the code still, then at 5 wpm for everyone except the new TECH license which should not require code skill. I propose that the novices and techs all be grandfathered as new TECH and the present TECH plus be grandfathered as new GENERAL license, since they have already in the past done 5 wpm. I am a scientist with a PhD. I have given this much consideration and strongly feel that the above mentioned suggestions are fair and equitable.
