

Dear FCC,

Please consider this simplified license structure and each class name:

Technician: no code, VHF only, 50 Mhz and up with a 50 watt output maximum.

General: 5 wpm, VHF, current General class and Novice HF frequencies
and modes with the exclusion of 30m, 17m, and 12m.

Advanced: 10 wpm, VHF, current Advanced class HF frequencies

Extra: 15 wpm, VHF, current Extra class HF frequencies

Then grandfather current Novice and Tech+ holders into the General class.

As well as, increase the technical challenge in all theory testing.

Thank you, (and sorry for duplicate failed submissions)

Bob Edwards, W4ED, AFA2LK.
