Subject: Comments to Commissioner Ness

David Carson (dcarson@oc.odessa.edu) writes:

I just bought a satellite dish and you wouldn't believe the hassle I'm having trying to get the network channels. The satellite service has the networks, but can't send them to me because of some out of date law not allowing them to send network channels if a local network provider is in the area.

I thought all of this new technology was about choice. I'd rather get a good signal off satellite than a lousy signal from a rooftop antenna. I understand this law is before congress and I'd like to see it changed so that I can watch network off satellite.

What is your stand on this issue?

Thanks for your time.
