J. W. Wood (Darkeyes@crazysexycool.com) writes:

FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

Gentleman,

The time has come for some of you to realize that you represent the people, the majority and not the special interest groups that pay for favors. It should be the right of every american to recieve the television programming of his choice. Presently we are being forced to pay for programming we do not want because it is beneficial to a few business men who capitalize on the greed of your unscrupulous brethren.

Specifically bills that make it impossible to receive local programming over a satellite dish. The same programming should be available for the large dishes as well as for the small dish owners. To make programming available on one size dish and not available on the other again favors the buisnessmen I referred to earlier.

Please remind these businessmen that the research that made these satellites possible was paid for by taxes from the very people they would like to gouge.

In addition I would like to ask omeone to explain to me why it is I can purchase a subscription to the NFL Sunday ticket and not watch the one game at home I really want. The local one. The money from my subscription goes to the NFL doesn't it? Then I should be able to watch it at home. As a consumer once I pay for the product I should be able to enjoy it at home! But some one in your midst has made it possible for a few men in suits to take my money and tell me to pay again at the local stadium to see the home team. This is an outrage. In essence because these men want more money the home game must be sold out before the local team is shown over the air. If you only have a dish and you have paid for a subscription you still cannot see the local game. When I pay for the Sunday ticket it is to see the local team. I do not need to sit in traffic to pollute the air, through the week is bad enough, The very act of keeping some vehicles off the road should be enough to mandate that all teams should be shown if you are paying for the subscription.

In closing I wiuold like to ask that you support H. R. 2921 & S.1422

Thank you!

Patricia Rinko (Louisepc@aol.com) writes:

I urge you to establish a viewing standard that will ensure families who cannot receive acceptable networking pictures using a rooftop antenna, can receive network programming via satellite.
