

I find it a total disgrace to our democracy that I have to even consider making a comment about such a law as this. It is obvious that we are rapidly heading down the road to a gross miscarriage of justice and a most hideous abuse of the privacy rights of the citizens of the United States. I strongly urge that this law be totally eradicated and if that is not feasible, then I urge that there be the most STRICT restrictions placed upon any agency and or individual who attempts to use this law. There should be the most strigent rules of evidence required for a warrant for this action and once the action is approved the results should be made immediately available to ALL parties who may be entrapped by this procedure. If legal proceedings ensue from data collected through this law, then ONLY that data directly related to the individual(s) being accused should be allowed in any trial procedures. ALL other data should be destroyed with NO copies being allowed to be maintained by ANY agency or person with the exception of the persons ensnared by any proceedings under this law, guilty or not.

thank you
