

DO NOT PASS THIS BILL.

This has to be one of the most FLAGRANT attempts to usurp the 1st Amendment Right to free speech yet attempted in this country.

If we are to assume that private communications between two people are to remain private, then the whereabouts of the same individuals ought, of right, be just as private.

If we submit to the argument that police should have every means technologically available at their disposal to conquer crime then we should all submit to being locked up and kept from the criminals. They will spend whatever it costs to find technologies to bypass new technologies leaving ONLY the lawful citizens to be the individuals monitored. We need the government to understand that the right to privacy is the primary tenant of the Constitution and it MUST NOT be infringed.
