

I hereby lodge a violation of my rights as a U.S. Citizen, caused by the monopolized action of the Network local affiliates in concert with the cable companies. I cannot receive a ledgible signal via the air waves and have purchased network access thru my Sat. provider, a judge in Miami Fla. has superceded the FCC's authority in declaring my receipt of Network TV as illegal, thereby censuring my right to purchase this service. If a federal judge with no electronic expertise can declare this why do we have an FCC??
