

I would like to comment on NPRM 98-143 even though it is past the filing date. I concur with the ARRL's proposal. I have read it thoroughly as well as the NPRM. The ARRL's proposal has been well coordinated with the amateur community and represents the best way to encourage amateur radio and the sense of community service that it represents. Without a fresh approach, amateur radio is going to fade away within a few decades. Let's listen to what they have to say....73 Bruce Johnson.....N7NYG.
