

A very unfair situation exists concerning the way that local network TV stations are being allowed to prevent me, my family, and my neighbors from receiving network programming in our homes via satellite dish.

We CAN NOT get a watchable TV signal from any 'local' network station because we are in the mountains of western NC. In spite of the fact that we cannot receive a picture via antenna, the nearest Fox, NBC, and CBS stations have refused to give us the waiver we must have to buy network programming via our satellite dish. These stations are in Greenville, SC, and Spartenburg, SC. This is completely unfair. Please help us.
