

I am writing to express my opposition to the ruling that will take away access to network tv (via primetime 24)for those who have home satellite systems. Several things stike me as unfair about this. Especially the fact that it only affects folks who have from June 1997 and later started to get this service. What about parity? My neighbor , under this rule, can keep his access, but I can't. Also it seems to be motivated by local stations that are bent out of shape that I'm not watching them. Well, number one, I can't get them in in a satisfactory fashion, and number two, If I want to pay to get an affiliate from Prme 24, It's my money, so why can't I? I cast my vote with my money. The only one that this ruling hurts is the consumer. Please let us keep our access.
