

I am extremely concerned about the recent letter I received from DirecTv regarding restrictions in service required by the FCC on limiting my network stations. I live in a city which broadcasts all 5 (NBC,ABC,CBS,PBS,FOX) networks, but due to the location of my home the adjacent hill the signals are blocked out and/or receive extensive multipath interference.

I will take any steps necessary to block any attempt to restrict my access to network television. I have contacted my local representatives and senators to help them to better understand households like mine.

Please reconsider all aspects of proceeding with this unfair practice of limiting the network audience.

Thank You,

Chuck Godfrey, PLS
