Sprint's Access Reform Proposal

Objective: Reduce interstate access charges to Forward Looking Economic Costs (FLEC)

Method:

- ◆ Maintain 6.5% productivity factor.
- ◆ Apply full annual reduction only to rate elements above FLEC.
- ◆ Cap CCLC revenues at growth in access lines.
- ◆ Focus current price cap performance review proceeding on identifying FLEC levels and determining appropriate transition.

RECEIVED
JUN - 6 1999

Benefits of Sprint's Access Reform Proposal

◆ IXC's

- ❖ Access rates will come down faster than under the existing 6.5% productivity plan.
- ❖ TS access rates will be reduced to FLEC faster than under proposals to increase the productivity factor.

◆ LEC's

- ❖ Provides reasonable transition to FLEC.
- ❖ Ensures that access rates are not driven below FLEC.

◆ Consumers

- ❖ Accelerated decreases in TS access rates will allow greater interstate toll rate reductions.
