RE: Provide Reverse Directory Services, CC Docket No. 98-193

To whom it may concern:

I am owner of a small business Consumer Detective Corporation where we provide a service to attorneys, insurance companies, as well as to the general public for their investigative needs.

Our success is built on the many services offered to a private investigation company Directory Assistance Services and the reverse directory service. In order for us to confirm a telephone number to an address we are able to input the telephone number we have in exchange for the address it belongs to. It also advises us if we have the wrong party. Needless to say this feature is valued in our line of work.

I personally am hoping that the importance of reverse directory services is known to those involved in the court hearing of docket No. 98-193 and taken into consideration the reverse effect it would have if it was not available to businesses like mine.

Thank you for your attention regarding this matter.

Sincerely yours,

Cheryl D. Ring
President
Consumer Detective Corporation
