Re: Provide Reverse Directory Services, CC Docket No. 98-193

We are a private investigating and consulting firm, specializing in general background investigations, along with surveillance investigations, security management consulting, fire and explosion investigations, insurance fraud investigations, and a number of other types of investigation and consulting.

In order to effectively complete a significant number of assignments, it is necessary for us to use Southwestern Bell DirectLine reverse search capability to conduct phone number searches. Most frequently we use DirectLine's reverse search capability when attempting to locate an individual or company. Not only does it provide us with a current phone number of the individual or company in question, but it also provides us with a current address. This has given us the ability to provide a current and accurate report to our client.

Sincerely,

Darren Dupriest  
Vice President Administration
