Fredy Torres (fhtorres@bigfoot.com) writes:

Sir,

Please consider the following. What ever you can do would help.

1.Urge Congress not to support the new version of H.R. 2921, passed by Mr. Henry Hyde's Committee. The new bill would kill satellite's ability to be competitive because it has a "must carry" rule.

2.Tell Congress "must carry" shouldn't apply to the DBS industry because it's a new industry. When cable was new they didn't have a must carry law. In fact, it was thirty years before they had to carry all the broadcaster stations in their markets and that happened because they became such a powerful local monopoly.

3.Support Congressman Billy Tauzin's efforts to give satellite providers a chance to become competitive before they have to do "must carry". Support a transition period for satellite companies.

Regards,
Fredy Torres

98-201

January 27, 1999
Re: CS. Docket #98-201
To Whom It May Concern,

We are satellite subscribers. We live in the Santa Cruz Mountains in California and are unable to receive even local television stations. Instead we subscribe to Satellite television programming to give us the news. Cable installers will not instal cable in our remote and very hilly location. Roof top antennas can't reach above the hills for reception. In our area there are many homes that depend on satellite programming to get any news and TV reception.

By removing the satellite network feeds we will be unable to receive any local news or Network programming.

Sincerely,

Tom, Allyn, and Erika

Kula
