Re: Docket 98-20

The following concerns are those of the San Fernando Valley REACT Inc. These views are shared by its team members and team officers. Please review and reconsider your decision to make 462.675 MHz an "emergency only" channel. As well as your decision to allow others to use private repeaters without the owners permission. 462.675 is not now, nor should be exclusively for emergencies and travelers assistance. Users need to be able to continue normal personal and family activities. Users should be required to have permission to use others repeaters.

Sincerely,

Michael T. Manahan, Secretary
San Fernando Valley REACT Inc.

RE: DOCKET 98-20

It is my belief that the two proposed FCC Rule Changes making frequency 462.675 an "emergency only" frequency defeats its GMRS purpose. It will increase radio traffic to the point of confusion to the users of this frequency.

The GMRS using 462.675 should remain as it is – a two way communication system licensed by the FCC for personal and family business. GMRS users must have permission to use other persons' repeaters.

Sincerely,

Henry S. Koslov
