Subject: Cable ISP access

I see AT&T and TCI are crying how terrible it will be if they have to allow customers their own choice of ISP instead of AT&T/TCI.

I sure as hell hope you shoot them down. Local telephone competition is a farce already; I'd really rather not go thru this same fiasco ten years from now with the cable companies and millions of incompatible and obsolete cable modems. Please, could we get local competition here at the beginning? Do it right for once?
