

To whom it may concern:

There is no FCC listing in the Columbus phone book, so I decided to try to email my complaint. I hope that someone might be able to explain the proper way for me to get in contact with someone who can help.

There is someone in my neighborhood who is operating a linear CB amplifier that interferes with all communications--telephone, internet connection, television and cable reception. This became an immediate problem when a relative tried to contact me by telephone in an emergency and could not be understood because of the CB breaking through the line.

Thank you for your time,  
Brian C. Alexander
