Re: ET Docket No. 98-156; Notice of Oral
Ex Parte Presentation; Amendment of Part
15 Regulations to Allow Certification of
Equipment in the 24.05 to 24.25 GHz Band
at Field Strengths up to 2500 mV/m.

Dear Madame Secretary:

This letter, being filed in duplicate, constitutes a memorandum of an oral *ex parte* presentation made to the Chief, Office of Engineering and Technology, this date, by representatives of the American Radio Relay League (ARRL). The letter is filed pursuant to the Section 1.1208(b)(2) disclosure requirements in permit-but-disclose proceedings.

The presentation was made by Rodney J. Stafford, President, and David Sumner, Executive Vice President of the ARRL, who were accompanied by the undersigned, General Counsel, ARRL. The presentation summarized the ARRL position on the referenced docket proceeding, and the anticipated adverse effect of high-powered Part 15 devices in the 24.05-24.25 GHz band on the Amateur Radio Service. The ARRL remarks were, each and all, addressed in written comments filed by the comment date, December 7, 1998, and in reply comments, filed January 4, 1999.

Any questions concerning this presentation should be addressed to the undersigned.

Yours very truly,

Christopher D. Imlay

cc: Dale Hatfield, Chief Engineer
