FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

RE: Ex Parte Presentation
CC Docket No. 96-45 – Universal Service/Proxy Cost Models
CC Docket No. 97-160 – Forward-Looking Cost Mechanism

Dear Ms. Salas:

Attached are copies of the Protective Order declarations that have been executed by AT&T and MCI WorldCom in the above-captioned dockets. Also attached are copies of the correspondence that AT&T and MCI WorldCom have sent to various Local Exchange Carriers seeking to review the proprietary data that they may have filed in these dockets.

To date, we have been able to view data filed by Bell Atlantic, BellSouth, Ameritech, GTE, SBC, Sprint and Aliant. SBC has not yet allowed us to inspect its vendor contracts. U S West has refused to allow inspection of its data other than at its Colorado headquarters.

Two copies of this Notice are being submitted to the Secretary of the FCC in accordance with Section 1.1206(a)(2) of the Commission's rules.

Sincerely,

Richard N. Clarke

Mr. Pete Sywenki
Director, Federal Regulatory Affairs
Sprint
1850 M Street, NW - Suite 1100
Washington, DC 20036

**Re: Proprietary Data submitted to the FCC in:
CC Docket No. 96-45 – Universal Service/Proxy Cost Models
CC Docket No. 97-160 – Forward-Looking Cost Mechanism**

Dear Mr. Sywenki:

Based on ex parte and other filings that you have made with the Federal Communications Commission in the above-captioned dockets, AT&T and MCI WorldCom understand that Sprint has provided the Commission with certain data that it believes are proprietary. These data pertain to the costs that Sprint incurs for the purchase, installation and operation of equipment used in its local exchange networks – or other costs including overheads. This may include information about the purchase and installation cost of end office or tandem switches, digital loop carrier systems, transmission systems, and/or the cost of outside plant elements such as cable and its placement, connectors, protectors, splicing, etc. Further information may have been provided on the quantities required of these pieces of a local network (e.g., loop and drop lengths, structure type and sharing percentages, etc.) Attached to the last page of this letter is a brief description of some, but quite possibly not all, of the proprietary data that you may have provided to the Commission.

Because AT&T and MCI WorldCom would like to be able to provide the Commission with an evaluation of the accuracy and relevance of these proprietary data for the purpose of establishing the forward-looking economic costs of local exchange networks, we request the opportunity to review these data pursuant to the Common Carrier Bureau's *Protective Order*.¹ In the event that these data were submitted to the Commission under protective restrictions different from those stated in the *Protective Order*, AT&T and MCI WorldCom request that the status of these data be changed so as

¹ This *Protective Order* was issued in CC Docket Nos. 96-45 and 97-160 on July 27, 1998 as DA 98-1490 (13 FCC Rcd. 13910 (1998)).

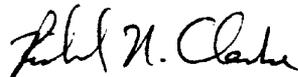

Mr. Pete Sywenki
May 12, 1999
Page 2

to be subject to inspection under the terms of the *Protective Order*. As informally agreed to among the parties, we request to inspect these data in Washington, D.C. – unless the volume or format of these data make that location impossible.

We would like to inspect these data as soon as possible, preferably during the week of May 17 to May 21. Could you please propose a date and time that would be convenient. Upon establishing this appointment, we will be happy to provide you with names of the AT&T and MCI WorldCom representatives who will inspect the data – and provide you with copies of the Declarations that each of these representatives has executed stating that they will abide by the terms of the *Protective Order*.

Thank you very much for your attention to this request. Please contact us if you have any questions. Richard Clarke may be reached at the above address, or by telephone at 908-221-8685, by fax at 908-221-4628, or email at rnclarke@att.com. Chris Frentrup may be reached at MCI WorldCom, 1801 Pennsylvania Avenue, NW, Washington, DC 20006, or by telephone at 202-887-2731, by fax at 202-887-3070, or email at Christopher.J.Frentrup@mci.com.

Sincerely,

Richard N. Clarke

Mr. Whit Jordan
Vice President - Federal Regulatory
BellSouth
1133 21st Street, NW - Suite 900
Washington, DC 20036

**Re: Proprietary Data submitted to the FCC in:
CC Docket No. 96-45 – Universal Service/Proxy Cost Models
CC Docket No. 97-160 – Forward-Looking Cost Mechanism**

Dear Mr. Jordan:

Based on ex parte and other filings that you have made with the Federal Communications Commission in the above-captioned dockets, AT&T and MCI WorldCom understand that BellSouth has provided the Commission with certain data that it believes are proprietary. These data pertain to the costs that BellSouth incurs for the purchase, installation and operation of equipment used in its local exchange networks – or other costs including overheads. This may include information about the purchase and installation cost of end office or tandem switches, digital loop carrier systems, transmission systems, and/or the cost of outside plant elements such as cable and its placement, connectors, protectors, splicing, etc. Further information may have been provided on the quantities required of these pieces of a local network (e.g., loop and drop lengths, structure type and sharing percentages, etc.) Attached to the last page of this letter is a brief description of some, but quite possibly not all, of the proprietary data that you may have provided to the Commission.

Because AT&T and MCI WorldCom would like to be able to provide the Commission with an evaluation of the accuracy and relevance of these proprietary data for the purpose of establishing the forward-looking economic costs of local exchange networks, we request the opportunity to review these data pursuant to the Common Carrier Bureau's *Protective Order*.⁷ In the event that these data were submitted to the Commission under protective restrictions different from those stated in the *Protective Order*, AT&T and MCI WorldCom request that the status of these data be changed so as

⁷ This *Protective Order* was issued in CC Docket Nos. 96-45 and 97-160 on July 27, 1998 as DA 98-1490 (13 FCC Rcd. 13910 (1998)).

Mr. Whit Jordan

to be subject to inspection under the terms of the *Protective Order*. As informally agreed to among the parties, we request to inspect these data in Washington, D.C. – unless the volume or format of these data make that location impossible.

We would like to inspect these data as soon as possible, preferably during the week of May 17 to May 21. Could you please propose a date and time that would be convenient. Upon establishing this appointment, we will be happy to provide you with names of the AT&T and MCI WorldCom representatives who will inspect the data – and provide you with copies of the Declarations that each of these representatives has executed stating that they will abide by the terms of the *Protective Order*.

Thank you very much for your attention to this request. Please contact us if you have any questions. Richard Clarke may be reached at the above address, or by telephone at 908-221-8685, by fax at 908-221-4628, or email at rnclarke@att.com. Chris Frentrup may be reached at MCI WorldCom, 1801 Pennsylvania Avenue, NW, Washington, DC 20006, or by telephone at 202-887-2731, by fax at 202-887-3070, or email at Christopher.J.Frentrup@mci.com.

Sincerely,

Richard N. Clarke
AT&T

Chris Frentrup
