

To the FCC

I am writing concerning 'The Matter of Creation of a Low pOwer Radio Service- MM Docket No. 99-25'. I urge that the FCC recommend that low power FM broadcasting be available to people of this country, without accompanying, onerous, technical barriers. I state this with the fullest support and with the knowledge that the greatness of this nation depends on the ability of this democracy to be reinvigorated. Through this medium can come greater community oriented and community produced broadcasting, more diverse voices on the airwaves as well as greater possibilities of imagination. I hope that Chairman Kennard and the FCC can fulfill their mission as the public guardians of the citizens' airwaves and enable citizens to exercise their constitutional rights in this essential way. Thank you.

Sincerely,
Mathew Mampara
