ATTACHMENT 2**INDUSTRY CONSENSUS FOR THE DISTRIBUTION OF THE CODES
REMAINING IN NPA 516****Return of Codes**

1. Any codes assigned prior to 5/1/99 and not activated within six months of the assignment date must be returned to the pool. Any codes assigned after 5/1/99 must be activated within three months of the assignment date, unless technical difficulties exist beyond the carrier's control. In the event of difficulties, this carrier will notify NANPA in writing on or before 90 days documenting an anticipated activation date.
2. The current code allocations will be reviewed to determine codes assigned to carriers under multiple OCNs. Any carrier currently holding multiple priority numbers issued in any one month as a result of requests under multiple OCN's will relinquish all but one of the code allocations.
3. Effective June 1, 1999, Lockheed Martin will begin reclamation procedures on any codes assigned on or before 12/1/98 and not yet activated. NANPA will continue reclamation based on a three-month activation period until relief is implemented.
4. Any codes returned will revert to the pool from which they were assigned.

Emergency Pool

An emergency pool of 12 codes (approximately 1/3 of the remaining codes) will be established and assigned on a first come, first served basis. A carrier meeting the imminent exhaust assignment criteria identified below will be allotted a code from this pool. Carriers may request codes under only one OCN per industry segment. Requests can be submitted to NANPA CO Code Administration beginning June 1, 1999 at 8:00 AM (PDT)/11:00 AM (EDT).

Imminent Exhaust Assignment Criteria**A. Growth Codes**

1. A carrier must supply to NANPA a Months-to-Exhaust form demonstrating, by switch or by rate center, number exhaust within three months.
2. The carrier must also supply to NANPA six months of historic utilization data and six months forecast data to support the exhaust projections. If the average projected monthly demand is within 15% of the average historical monthly utilization, a code will be assigned. If the demand exceeds 15% of the utilization, the carrier must explain the deviation prior to code assignment.
3. The carriers must review all numbers in their reserved status to insure that it only retains those numbers for which the carrier has a legally enforceable written agreement.
4. The carrier must have reduced their aging period to 30 days unless a longer period is required by state regulation or a contractual agreement.

B. Initial Code in a Rate Center

1. A carrier must supply to NANPA documentation, by switch or by rate center, of a bona fide request to provide service within three months.
2. The carrier must also supply to NANPA documentation that within three months, they will be interconnected and have sufficient operable facilities in the switch/rate center requested.

ATTACHMENT 2**Assignment of Remaining Codes**

The codes remaining to be assigned after the establishment of the emergency pool, will be Assigned, until exhausted, in priority number order, to those carriers already on the priority list and meeting the extreme exhaust criteria listed below. NANPA will immediately notify carriers holding priority numbers that in order to retain their priority number, by June 1, 1999, they must provide the documentation required in the extreme exhaust assignment criteria. Assignments will be complete and notification sent to the carriers by June 15, 1999.

Extreme Exhaust Assignment Criteria**A. Growth Codes**

1. A carrier must supply to NANPA a Months-to-Exhaust form demonstrating, by switch or by rate center, number exhaust within four months.
2. The carrier must also supply to NANPA six months of historic utilization data and six months forecast data to support the exhaust projections. If the average projected monthly demand is within 15% of the average historical monthly utilization, a code will be assigned. If the demand exceeds 15% of the utilization, the carrier must explain the deviation prior to code assignment.
3. Carriers must review all numbers in their reserved status to insure that it retains only numbers for which the carrier has a legally enforceable written agreement.
4. The carrier must have reduced their aging period to 30 days unless a longer period is required by state regulation or a contractual agreement.

B. Initial Code in a Rate Center

1. A carrier must supply to NANPA documentation, by switch or by rate center, of a bona fide request to provide service within four months.
2. The carrier must also supply to NANPA documentation that within four months, they will be interconnected and have sufficient operable facilities in the switch/rate center requested.

Suspension/Denial of a Code Application (Imminent or Extreme Exhaust, Growth or Initial)

1. If NANPA determines that the documentation submitted by an applicant does not meet the established criteria, NANPA should suspend the application and allow the applicant two weeks to resubmit their documentation.
2. If the documentation is not resubmitted or NANPA determines that the documentation still does not meet the established criteria, the code will be denied.

Re: Docket Nos. 990373-TP

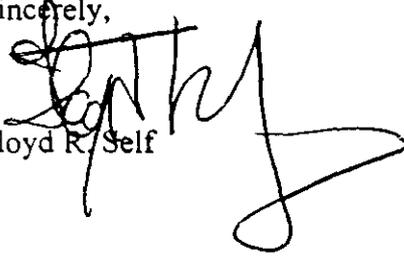

Dear Ms. Bayo:

Enclosed for filing are an original and fifteen copies of the Joint Motion to Accept Stipulation and Voluntary Number Conservation Measures, Issue a Temporary Stay, and Request for Expedited Ruling in the above referenced docket.

Please acknowledge receipt of these documents by stamping the extra copy of this letter "filed" and returning the same to me.

Thank you for your assistance with this filing.

Sincerely,

Floyd R. Self

FRS/amb
Enclosure

cc: Tracy Hatch, Esq.
Parties of Record

2. Since the Commission first considered the matters that are the subject of this docket, numerous members of the industry and other interested persons have been working to prepare a document that would address the single issue now set for hearing on July 7 and 8, 1999.

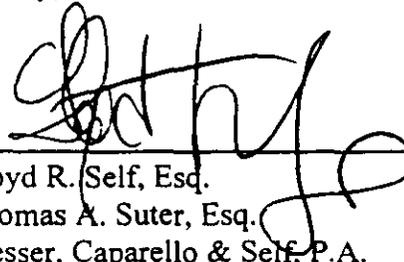

3. Attached to this Joint Motion is the Stipulation and Voluntary Number Conservation Measures that have been prepared to resolve this docket. The Joint Movants believe that when implemented pursuant to its terms, the actions identified in the Stipulation and Measures will be in the public interest.

4. Because of the nature of such an undertaking, the Joint Movants have not been able to obtain the participation or agreement of every Florida NPA code holder. However, the Joint Movants believe that the Stipulation and Measures address eventual inclusion of such other code holders through other industry or regulatory processes. The Joint Movants contemplate that additional code holders will eventually add their signatures to the attached Stipulation and Measures or that the parties to this docket that have not executed the Stipulation and Measures will separately advise the Commission of their position regarding the Stipulation and Measures.

5. Undersigned counsel has the permission of each of the Joint Movants to represent that they join in this Joint Motion and have authorized undersigned counsel to submit this Joint Motion on their collective behalf.

WHEREFORE, the Joint Movants respectfully request that the Commission approve the attached Stipulation and Voluntary Number Conservation Measures according to its terms, grant the requested temporary stay so as to enable consideration of the Stipulation and Measures, and that the Commission handle these matters on an expedited basis.

Respectfully submitted, this 27th day of May, 1999 on behalf of the Joint Movants.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Establishment of a Statewide Emergency)	Docket No. 990373-TP
Area Code Relief Plan)	Filed: May 27, 1999
<hr/>		

STIPULATION AND VOLUNTARY NUMBER MANAGEMENT MEASURES

WHEREAS, in response to the North American Numbering Plan Administration's ("NANPA") notification that a number of Florida NPAs are in jeopardy of premature exhaustion, the Florida Public Service Commission ("FPSC") established this docket to address emergency, interim number conservation measures;

WHEREAS, the FPSC issued Order Number PSC-99-0606-PCO-TP setting for hearing the issue of statewide consecutive distribution of telephone numbers by code holders;

WHEREAS, in *Memorandum Opinion and Order and Order on Reconsideration*, FCC 98-224 (Sept. 28, 1998), the Federal Communications Commission ("FCC") delegated limited authority to state commissions to order NXX Code rationing only in conjunction with the adoption of an area code relief plan and only if the industry is unable to reach consensus on a rationing plan;

WHEREAS, the undersigned Florida NXX code holders recognize the need for efficient number resource management;

WHEREAS, this Stipulation and Voluntary Number Management Measures are consistent with the directions and definitions in the Industry Numbering Committee (INC99-0127-23) 1000s Block (NXX-X) Pooling Administration Guidelines ("Guidelines") and follow the administration techniques and facilitate the efficient use of numbers as reflected in Section 2.7 of the Guidelines which provides that service providers shall establish internal policies and practices that provide for the efficient use and assignment of numbers to end users, that the policies and practices shall balance product specifications, market strategies and customer needs with conservation principles to ensure best practices and number utilization, and that service providers should attempt to assign telephone numbers out of a given block before making assignments out of another block;

WHEREAS, the undersigned Florida NXX code holders, without conceding jurisdiction to the FPSC to order specific number conservation and resource management measures in this docket, desire to implement a voluntary industry plan to preserve 1000s number blocks until such time as there is a lawful plan for number pooling or number conservation;

WHEREAS, the undersigned Florida NXX code holders believe that the prudent management of such 1000s number blocks will promote the efficient use of available numbering resources according to current applicable industry directions and guidelines and will help preserve these blocks in the event that 1000s number block pooling is implemented;

WHEREAS, the undersigned Florida NXX code holders believe that their voluntary 1000s number block management measures will provide a superior and more timely means of accomplishing the FPSC's objectives for this docket than the hearings scheduled for July 7-8, 1999; and,

WHEREAS, the undersigned Florida NXX code holders believe that the voluntary 1000s number block management measures detailed herein will alleviate the need for any further proceedings in this docket on consecutive numbering;

NOW, THEREFORE, the undersigned hereby request that the Commission issue an order closing this docket and the undersigned Florida NXX code holders do hereby agree to implement the following telephone number management measures:

1. Service Providers will set aside, within their telephone number ("TN") administration systems, uncontaminated 1000s number blocks. Each Service Provider will maintain no greater than nine (9) months of 1000s block TN resources to be used to meet customer demand. This type of variable demand analysis allows for the different telephone number demand patterns inherent in different geographic areas (e.g., rural central office versus urban central office) and is consistent with current Industry Numbering Committee ("INC") Thousand Block (NXX-X) Pooling Administration Guidelines and Central Office Code Administration Guidelines which employ similar threshold concepts (e.g., months to exhaust). Numbering resources will be moved a 1000s block of TNs at a time as required by the Service Provider in order to maintain the nine (9) months of TN inventory or to meet a specific customer requirement. If and when telephone number pooling is implemented in a specific rate center, LRN-LNP capable Service Providers will analyze their inventory of vacant 1000s blocks, as well as any qualified contaminated blocks, for potential contribution to an industry telephone number inventory pool. This would be done in accordance with procedures outlined in the final INC national telephone number pooling guidelines.
2. Service Providers will continue to operate within the existing national Central Office (CO) Code Assignment Guidelines and/or any Code Jeopardy procedures agreed to by the industry. This includes, but is not limited to, a Service Provider's ability to request additional NPA-NXX codes from the Code Administrator when projected customer demand will exhaust the Service Provider's existing TN inventory within the applicable months to exhaust in a code jeopardy situation, the preparation of the required

supporting documentation (i.e., Appendix B), and the certification that an NXX code request is in compliance with all requirements outlined in the Central Office Code Assignment Guidelines and Code Jeopardy procedures, as well as the TN Assignment Principles included herein.

3. Where practicable, Service Providers will set aside (i.e., restrict from assignment in their TN Assignment/Administration systems) all uncontaminated 1000s blocks. An uncontaminated 1000s block is defined as a block within which all TNs are available for assignment. As defined in the resolution statement of INC Issue 134, Common Number Status (Resolution date 4/26/99), telephone numbers unavailable for assignment include Assigned Numbers, Administrative Numbers, Aging Numbers, and Reserved Numbers. An Administrative Number is defined as any one of the following: 1) a number used for internal business or official purposes, 2) identical to a Location Routing Number (LRN), 3) a test number, 4) a Temporary Local Directory Number (TLDN), or 5) a Wireless E911 ERSD/ESRK Number.
4. Service Providers will not add to their inventory of available TNs for each rate center or switch, in case of a multiple switch rate center, until there is insufficient inventory to meet nine (9) months of projected customer demand. The nine (9) months of projected customer demand will be determined by analyzing the historical demand trends for business and residential customers, seasonal requirements, and volatile growth patterns of certain products and services (e.g., DID, Centrex, new services, Type 1 wireless interconnection).
5. Service Providers will release numbering resources in 1000s number blocks as required in order to maintain the nine (9) month inventory supply or to meet a specific customer requirement. Examples of a specific customer requirement would be the need for sequential 1000s blocks, a particular number series, or a bona fide customer request for a specific number.
6. Each NXX code holder shall submit utilization reports upon written request of the FPSC, but not exceeding twice per year. Reports submitted in response to the March 22, 1999, FPSC data request would be considered part of the semiannual request described in this paragraph. For code holders other than commercial mobile radio service ("CMRS") providers, the reports shall be on the basis of 1000s number blocks and no greater detail shall be required. The reports would measure adherence to these voluntary number administration proposals. These reports will continue to be submitted until actual number pooling is implemented or until such time as NANPA assumes this responsibility and provides aggregate data to the FPSC. Any such reports submitted to the FPSC will be submitted as confidential and proprietary information and should be considered as such by the FPSC under section

364.183(1), Florida Statutes. Because section 364.02(12), Florida Statutes, expressly exempts CMRS providers from the definition of "telecommunications company" for purposes of the FPSC's jurisdiction and because CMRS providers utilize NXX codes in a substantially different manner from landline carriers, CMRS providers will submit voluntary reports to the FPSC on an NXX basis, rather than a 1000s number block basis, with the understanding that such reports should be treated as confidential by the FPSC in view of their proprietary and trade secrets contents.

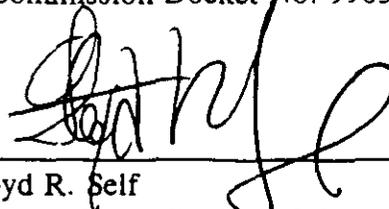

7. Not all Florida NXX code holders have taken part in this stipulation and its voluntary 1000s number block management measures. Therefore, the undersigned Florida NXX code holders agree that they will advocate the adoption of the voluntary 1000s number block management measures contained herein by all such other Florida NXX code holders.
8. This stipulation and the voluntary number management measures contained herein are entered into for purposes of settlement only. This document shall be valid and binding on the undersigned parties only to the extent it is adopted in its entirety as presented to the FPSC and only upon closure of the docket. Further, by virtue of the voluntary nature of the 1000s number block management measures agreed to herein, the issues set for hearing in this matter have been fully and completely resolved.
9. By agreeing to the voluntary 1000s number block management measures described herein, the undersigned Florida NXX code holders are not conceding that the FPSC has jurisdiction over numbering matters beyond the authority specifically delegated to the States by the FCC, that the FPSC has jurisdiction to implement number pooling, or that the FPSC has jurisdiction over CMRS providers. Accordingly, this document shall not be used by any person to assert that the undersigned have conceded jurisdiction on such issues or that they have waived any rights with respect to such jurisdictional issues.
10. This stipulation and its associated voluntary 1000s number block management measures shall take effect on the date that the FPSC closes this docket. Each undersigned NXX code holder shall implement the voluntary 1000s number block management measures described herein as quickly as possible, but in no event later than 60 days from the date the FPSC closes this docket.
11. If the Commission accepts this document and closes the docket, the undersigned shall not request reconsideration or appeal of the order of the Commission accepting this document in accordance with its terms.

12. Each undersigned Florida NXX code holder shall continue with the voluntary number management measures described herein until such time as there is a number pooling or 1000s number block conservation plan that includes Florida NXX code holders, whereupon such plan shall supersede the voluntary 1000s number block management measures described herein.
13. In the event that the FPSC does not accept this document in its entirety, this document shall not be admissible in the final hearing on the matters established by this docket, or in any other docket or forum. Moreover, no party waives any position on any issue that it could have otherwise asserted in the final hearing if this document had never been developed.

Respectfully submitted, this 27th day of May, 1999.
