FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

In the Matter of)	
)	
Amendment of Section 73.202(b))	MM Docket _____
Table of Allotments)	
FM Broadcast Stations)	RM No. _____
(Greenville and Cooper, Texas))	

To: Chief, Allocations Branch
Policy and Rules Division
Mass Media Bureau

PETITION FOR RULE MAKING

First Greenville Corp., licensee and assignor of Station KIKT(FM), Greenville, Texas and KRBE LICO, Inc., assignee of Station KIKT(FM) (BALH-990707GE) ("Petitioners"), jointly, by their respective counsel, hereby file this Petition pursuant to Section 1.420(i) of the Commission's Rules, to change the community of license for Station KIKT(FM) on Channel 228C3 from Greenville, Texas to Cooper, Texas as that community's first local service and to modify the KIKT license accordingly. In support hereof, Petitioners state as follows:

1. Petitioners desire to change the community of license for Station KIKT from Greenville to Cooper under the guidelines set forth in Amendment of the Commission's Rules Regarding Modification of FM and TV Authorizations to Specify a New Community of License, 4 FCC Rcd 4870 (1989), recons. granted in part 5 FCC Rcd 7094 (1990). First, as indicated in the attached Engineering Statement, the proposed use of Channel 228C3 at Cooper is mutually exclusive with its current use at Greenville. Second, Greenville will continue to be served by Station

No. of Copies rec'd 044
List ABCDE
MMB

KGVL(AM), 1400 kHz. Thus Greenville will not be deprived of its only local service. Third, under the Commission's allotment priorities, Cooper (pop. 2153 - 1990 U.S. Census) should be favored for a first local service (Priority 3) over a second local service at Greenville, Texas (pop. 23,071) despite Cooper's smaller size. See Revision of FM Assignment Policies and Procedures, 90 FCC 2d 88 (1982). See also Marion and Orrville, Alabama, 6 FCC Rcd 3482 (1991) and Jessup and Midway, Georgia, 6 FCC Rcd 2196 (1991) and Oshkosh, Wisconsin, et al. 10 FCC Rcd 2085 (1995).

2. Cooper is not located within any Urbanized Area. In addition, the proposed KIKT 70 dBu contour will not cover any portion of an Urbanized Area. See Engineering Statement.

3. Cooper is an incorporated community listed in the 1990 U.S. Census. Cooper has its own local government, including a mayor, police department, fire station, post office (zip code 75432), housing authority, water treatment plant, independent school district, including a high school. See Exhibit 1. Cooper also is the seat for Delta county government offices. Cooper has its own churches, a variety of businesses and health facilities. See Exhibit 1.

4. Channel 228C3 can be allotted to Cooper consistent with the Commission distance separation requirements. See Engineering Statement. Should Channel 228C3 be reallocated to Cooper, either the Assignor/Licensee or the Assignee will file an application for the station's new community of license, depending upon whether the assignment of license has been approved and closed at that time.

5. By relocating the transmitter site to a new location there will be a gain and loss area. The gain area will consist of 57,306 persons. The loss area will contain 71,358 persons resulting in a net loss of 14,052 persons. However, the loss area should not be a factor here because the proposal is to provide a first local service to Cooper. See e.g., Temple and Taylor, Texas, 12 FCC Rcd 13755 (1997). In addition, if the Commission evaluates the existing coverage area of KIKT using its

current facilities of 9.1 kw ERP and 100 meters HAAT, there is an actual gain in population to be served of 11,715 persons. See Engineering Statement. Finally, there are at least five aural services remaining in the loss area. See Engineering Statement.

6. Accordingly, the instant petition for a first local service to Cooper, Texas should be adopted.

Respectfully submitted,

FIRST GREENVILLE CORP.

TECHNICAL EXHIBIT
IN SUPPORT OF
A PETITION FOR RULE MAKING
TO AMEND THE FM TABLE OF ALLOTMENTS
GREENVILLE AND COOPER, TEXAS

Technical Narrative

This technical narrative and associated exhibits have been prepared on behalf of FM station KIKT (herein "Petitioner") in support of a Petition for Rule Making to amend Section 73.202(b) by the reallocation of channel 228C3 from Greenville, Texas to Cooper, Texas and the modification of the license of KIKT on channel 228C3 at Greenville, accordingly (BLH-961220KB). As the requested change to channel 228C3 at Cooper is mutually exclusive with the present allotment of channel 228C3 at Greenville, Petitioner invokes the provisions of Section 1.420(i).

The following is a summary of the reallocation proposal:

- The community of Cooper, Texas (1990 population 2,153) will be provided with its first local aural transmission service and Greenville, Texas (1990 population 23,071) will not be deprived of its sole "existing" local service as there is one fulltime AM assignment at Greenville, namely, KGVL on 1400 kHz.
- Cooper is not located within any Urbanized Area as defined by the 1990 U.S. Census.
- There are at least 5 other aural services available to the 1 mV/m loss area.
- The proposed KIKT operation will not place a 70 dBu signal over any portion of an Urbanized Area and, therefore, constitutes a first local service at Cooper.

Proposed Change in Table of Allotments

Station KIKT is currently licensed (BLH-961220KB) to operate on channel 228C3 at Greenville, Texas with an effective radiated power (ERP) of 9.1 kW and an antenna height above average terrain (HAAT) of 100 meters. Station KIKT's current facilities, which are less than the Class C3 maximum (ERP 25 kW/HAAT 100 meters), were authorized under Section 73.215 (Contour Protection for Short-Spaced Assignments). Greenville is located in Hunt County and has a 1990 U.S. Census population of 23,071 persons. Fulltime AM station KGVL on 1400 kHz is licensed to serve Greenville. Therefore, adoption of the proposal will not deprive Greenville of its sole "existing" local service.

Cooper, Texas is located in Delta County and has a 1990 U.S. Census population of 2,513 persons. Cooper has no other local FM or AM service and, therefore, Petitioner's proposal would bring first local aural broadcast service to Cooper. Accordingly, Petitioner requests modification of the FM allocation table as follows:

<u>City</u>	<u>Present</u>	<u>Proposed</u>
Greenville, Texas	228C3	--
Cooper, Texas	--	228C3

Compliance With FCC Rules

The attached Figure 1 is a tabulation of required separations pertinent to use of channel 228C3 at Cooper. The reference site complies with the Commission's minimum distance separation requirements contained in Section 73.207 to all existing, authorized and proposed stations and allotments. Operation from the reference

site will provide the requisite city grade signal to all of Cooper.

Figure 2 is a map showing the area to locate channel 228C3 at Cooper in compliance with the Commission's minimum distance separation requirements and city coverage requirements based on maximum Class C3 facilities (ERP 25 kW/HAAT 100 m).

Pursuant to Section 1.420(i), the Commission will consider petitions to modify the license/construction permit of an FM station to specify a new community if the proposed allotment would be mutually exclusive with the present assignment. As the entire area to locate for channel 228C3 at Cooper depicted on Figure 2 would be short-spaced to the authorized KIKT channel 228C3 operation, the new allotment is mutually exclusive with the existing allotment.

Urbanized Area Considerations

Cooper, Texas is not located within any Urbanized Area as defined by the 1990 U.S. Census. Furthermore, the closest point of Cooper is located 82 km from the closest point of the Dallas-Fort Worth Urbanized Area. Furthermore, the proposed 70 dBu contour will not encompass any portion of the closest Urbanized Area (Dallas-Fort Worth). Therefore, it is believed that the proposal warrants a first local service at Cooper.

Gain and Loss Areas and Available Aural Services

Figure 3 is a map showing the FM 1 mV/m primary service contours for the licensed KIKT operation on channel 228C3 at Greenville and the proposed KIKT

operation on channel 228C3 at Cooper. Maximum facilities and uniform terrain were used to determine the contour locations. The current KIKT 1 mV/m contour, presuming operation with maximum Class C3 facilities, contains a population of 92,191 persons and the proposed 1 mV/m contour contains a population of 78,139 persons. Furthermore, as depicted on Figure 3, the 1 mV/m "gain" and "loss" areas contain 57,306 and 71,358 persons, respectively, and the common area contains 20,833 persons.¹

Figure 4 is a map which depicts the 1 mV/m gain and loss areas and the other aural (FM, AM) services available to the gain and loss areas.² Figure 5 tabulates the FM and AM stations whose contours are shown on Figure 4. Only those FM services necessary to provide at least five (5) fulltime aural services to the gain and loss areas have been shown on Figure 4.

FM 1 mV/m Coverage Contours

The FM predicted coverage contours were calculated in accordance with the provisions of Section 73.313, except that uniform terrain was presumed in all directions. Distances to AM contours were based on either nondirectional radiation pattern values or standard radiation pattern values obtained from the FCC's AM

¹ The KIKT 1 mV/m contour, presuming operation with its current Class C3 facilities, contains a population of 66,424 persons and the proposed 1 mV/m contour contains a population of 78,139 persons. Furthermore, the 1 mV/m "gain" and "loss" areas contain 60,516 and 48,801 persons, respectively, and the common area contains 17,623 persons.

²The determination of available reception services was based on the criteria set forth in footnote 1 of the Notice of Proposed Rule Making in MM Docket No. 96-219 (DA 96-1774; adopted October 25, 1996, released November 1, 1996).

database. FCC Figure M-3 conductivity employed along all azimuths.

Population and Area

The population within each FM primary service contour (1 mV/m) and each gain and loss area was calculated using a computer program that utilizes the 1990 U.S. Census database of "population centroids". The program adds the populations of those U.S. Census designated areas whose centroid was within each service area. The area within each FM primary service contour was calculated using a root mean square algorithm.

Conclusion

Channel 228C3 can be reallocated from Greenville, Texas to Cooper, Texas in compliance with all applicable Commission Rules. The proposal will result in a first local broadcast service to Cooper. The proposal would not deprive Greenville of local aural broadcast service. Therefore, Petitioner requests the substitution and reallocation of channel 228C3 from Greenville to Cooper and the modification of the Petitioner's license to specify operation on channel 228C3 at Cooper.

Cooper also has a brand new Cooper High School / Middle school for the students. Bam Morris attended Cooper High School, where he led the state in rushing with 2,972 yards and 39 TDs as a senior and in three seasons, compiled a phenomenal 6,970 rushing yards and 89 TDs. He now plays in the NFL for the Kansas City Chiefs. His brother Ron Morris played for the NFL Chicago Bears in 1987, but he had to retire due to injuries and their cousin, Terry, is a renowned professional boxer.
