Secretary
Federal Communications Commission
445 12th Street S.W.
Washington, DC 20554

Dear Commissioners and Commission staff,

Mr. Joseph D'Alessandro Hereby submits a request and or Petition to the FCC ,to make into Law,that all NAB,and NPR Radio Stations must Regress all power (ERP) watts,to 10 to 3000 Watts to serve their Community of License,and abide by the Custom Laws Of A Nation and the Communications Act's. This will open the Free Market to the American Citizens across the United States,to Serve and Use their Airspace to Broadcast to their Community's.

Philosophical and Legal Foundations of Commercial Radio

The basic landmark agreement between commercial radio and the people of the

United States was established in the Communications Act of 1934 and has become the unifying thread of all telecommunications laws since then. The basic agreement was actually established in the years before.

This important law established basic philosophical principles:
The airways are public property.
Commerical broadcasters are liscensed use the airways.
The main condition for use will be whether the broadcaster served "the public interest, convenience, and necessity."
