LICENSEES REQUIREMENT AND RESPONSIBILITY TO CURE RADIO INTERFERENCE

The proposed transmitter site location is presently used by a very limited number of two-way radio users. We therefore expect no interference whatsoever, due to the limited amount of receivers and other transmitters in the area. The applicant has employed the Company that maintains almost all of the two-way radios "On site" as well as the area. This company has installed all of the two-way radios at this site. His company has done a complete "channel study" of all licensed or operating systems in a one mile radius of the proposed FM broadcast tower/station. This study finds that the proposed station has no "IF" related channels within the study area.

The applicant is aware of the possibilities of some interference occurring, in or near the proposed broadcast station. Should any such interference occur because of the operations of the proposed FM broadcast station, the applicant, Fatima Response, Inc., through this exhibit states that it will except full responsibility for the prompt elimination of and all objectionable interference that may be caused to any existing or new users within the proposed stations 115 dBu contour area. The applicant will employ Mr. Hansen to check on any occurrences of radio interference and to solve the problem if and when it arises.

The instant application meets and exceeds the ANSI "Worst Case" exposure levels and is categorically removed from consideration. The applicant will reduce power or cease operations while workers are on or near the tower. The applicant will provide a non-required fence around the entire transmitter site/tower. The site will be posted notifying all persons of the RF energy being transmitted from the site.
