

The United States Senate  
To: All Members of the Senate  
Washington DC 20510

Now that the "Interference" issue is largely dead ... the broadcasters are going to say that for the United States to join the rest of the planet in a digital future ... we cannot open these new frequencies and use up the space that the big annointed broadcasters need to "go digital."

Digital radio as the big broadcasters have proposed it will be a FARCE.

It is very likely that the digital they claim to support will be so bad that it would destroy them and therefore it is likely that there are no serious plans to go digital at all.

Notably the plans for going digital have been laying on a shelf since 1992 ... because the plans won't work! The Big Broadcasters only drag out these plans now to try to kill Community Radio.  
(for more information, go to our FAQ section)

3)Allies of Big Broadcasters in Congress are attempting to threaten FCC with "Reauthorization Hearings."

Shortly after the FCC originally started this process, "Billy" Tauzin started his "Reauthorization Hearings" ... and the hearings started THE next DAY after a letter in SUPPORT of Community Radio went out with just under 30 cosigners to the "Bonior Letter".

Representative Bonior of Michigan had invited other Congresspersons to sign on to his letter of support for the Low Power Radio Service ... and when only 28 signed on ... Tauzin felt empowered to condemn the FCC as if his voice was the only one that matters.

Unfortunately, since he is the House Telecom Subcommittee Chair ... unless many more Congressmen can be convinced to publicly support the Low Power Radio Service ... he is likely going to get away with this corruption!!
