Provisions of the Telecommunications Act of 1996)	

**COMMENTS
OF THE
UNITED STATES TELECOM ASSOCIATION**

The United States Telecom Association (USTA)¹ hereby files its comments on the petition filed by the Georgia Public Service Commission (Georgia) for delegation of additional authority to implement various number conservation methods in the above-captioned proceeding.² In its petition, Georgia seeks delegated authority to: (1) institute thousand block number pooling; (2) order the return of unused and reserved NXX codes; (3) set NXX code allocation standards; and (4) require submission of utilization data.

At least eighteen other states have filed requests with the Commission since February 1999 seeking similar individual state relief to deal with number shortages.³ The Commission has

¹ The United States Telecom Association, formerly the United States Telephone Association, is the nation's oldest trade organization for the local exchange carrier industry. USTA represents more than 1200 telecommunications companies worldwide that provide a full array of voice, data and video services over wireline and wireless networks. USTA members support the concept of universal service and are leaders in the deployment of advanced telecommunications capabilities to American and international markets.

now granted portions of ten of the states' requests.⁴ As USTA has cautioned, other states have jumped on the bandwagon with "me too" applications, thereby creating a burden on the Commission's processes and the industry's resources. USTA believes that the industry's and the nation's first priority in these matters must be to develop and implement a nationwide, uniform system of numbering. The Commission has consistently stated that it intends to develop a nationwide, uniform system of numbering and that such a system is "essential to the efficient delivery of telecommunications services in the United States."⁵ The Commission has further recognized that the industry, the Commission, and the states should work together to develop national methods to conserve and promote efficient use of numbers, but that those attempts "cannot be made on a piecemeal basis without jeopardizing telecommunications services throughout the country."⁶

USTA believes that the Commission should adhere to its policy that orderly national numbering conservation and administration measures are essential to the optimization of the

North American Numbering Plan (NANP). The Commission must not further yield to the requests by individual states to fragment and decentralize number administration. As USTA has repeatedly stated, the effects would be disastrous to number planning and conservation in this country. Such action would result in a significant loss of effectiveness of the national program and its numbering conservation and administrative policies, and the diversion of resources will delay development of effective national measures. The Commission needs to focus on these national programs and the development of orderly national measures, rather than to devote so much of its own and the industry's resources to these individual state requests that will undermine the vital national scheme.

USTA has filed comments on each of the petitions, opposing the states' requests for additional authority that would jeopardize the industry processes underway for comprehensive nationwide number conservation. USTA has also addressed the issue of the states' authority to implement conservation measures on an individual basis in its comments and reply comments in response to the Commission's Notice of Proposed Rulemaking in CC Docket No. 99-200, Numbering Resource Optimization (Notice).⁷ Notwithstanding the Commission's partial grant of some of the states' requests, USTA continues to oppose the grant of additional authority to individual states in contravention of the nationwide number conservation policies and procedures. To the extent that Georgia seeks additional authority that would frustrate the national number conservation plan, USTA opposes the Georgia request for the reasons articulated in its earlier pleadings. Rather than repeat the reasons stated therein, USTA hereby incorporates by reference all of its pleadings filed in the proceedings listed in footnotes 2 and 7, *supra*.

⁶ *Id.*

⁷ FCC 99-122, released June 2, 1999.

USTA provides the following comments on some of Georgia's specific requests for authority in light of the Commission's recent actions on other states' petitions.

1. Thousand Block Number Pooling

Georgia seeks authority to implement mandatory thousand block number pooling. Number pooling has been addressed by USTA in its previous comments filed on the state petitions and the Commission's Notice of Proposed Rulemaking in CC Docket No. 99-200, which could be repeated here but are incorporated by reference. However, USTA believes that a careful analysis needs to be conducted which would show if the potential benefits of thousand block pooling are great enough to justify its implementation.

Although Georgia does not specify whether it would implement thousand block pooling trials using the software version 1.4 or version 3.0, a broad range of carriers, including ILECS, AT&T and MCI Worldcomm, have objected to additional deployment of version 1.4. The Commission should investigate the problems connected with this version and should not, in the meantime, delegate any authority that would permit any state commission to require its further deployment.

We must reiterate that the industry is working energetically to conclude development of the details of thousand block pooling that is supported by version 3.0 of the NPAC software. Pooling based on version 1.4 in Illinois has been a valuable learning experience for the industry, but it also has its problems, one of which is that it cannot support efficient data representation (EDR). The industry is not looking to this form of pooling for long term deployment. USTA also believes that the notion that version 1.4 can be deployed quickly is incorrect. It is essential that all industry energy and activity be focused on the form of pooling to which the industry has

committed for the future. For these reasons, we urge the Commission to conclude that any pooling deployment ordered pursuant to Commission authority be compliant with version 3.0.

2. Reclamation of Unused and Reserved NXX Codes and Allocation Standards

Georgia seeks authority to reclaim unused and reserved NXX codes. In response to a complaint in the Wisconsin Petition, USTA maintained that the Commission should clarify the responsibility and authority of NANPA.⁸ We also observe that California, New York, Florida, Massachusetts, Maine, Ohio, Utah, Missouri, and Iowa each requested similar relief. As we stated in our comments to the New Hampshire Petition,⁹ the Commission has uniformly responded to those requests and we believe that the form of the Commission's response is very close to what is required for a broader solution to these problems. In each case, the Commission stated, "Therefore, we grant authority to the [state] Commission...to direct the NANPA to reclaim NXXs that the [state] Commission determines have not been activated in a timely manner.... We further direct the NANPA to abide by the [state] Commission's determination to reclaim an NXX code if the [state] Commission is satisfied that the code holder has not activated the code within the time specified by the CO Code Assignment Guidelines."¹⁰

In this delegation, the Commission has not authorized the state commissions to reclaim NXX codes themselves, but to direct the NANPA to reclaim codes. In the Commission's prescription, it is still the NANPA that reclaims the codes. USTA believes that if, in the first instance, the NANPA was confident of its authority and obligations, it would, on its own, reclaim codes that NANPA knew were being used in any manner inconsistent with the guidelines. If those conditions were clear, and the state commission were to advise the NANPA

⁸ USTA Comments in Docket No. 99-200 at 6. and Reply Comments at 12, USTA Comments on the Wisconsin Petition at 4-5.

⁹ USTA Comments on the New Hampshire Petition at 6.

of misuse of codes and provide support for that conclusion, we believe NANPA would reclaim the codes. If the Commission were to validate the authority and responsibility of the NANPA to act in accordance with provisions in the guidelines and require that the NANPA must consider evidence provided by regulatory commissions when making such decisions, no additional state authority would be necessary.

As it did in its comments on the Ohio Petition,¹¹ USTA recommends that the Commission affirm the authority and responsibility of the NANPA to act in accordance with provisions in the industry guidelines and that NANPA is to consider information provided by state commissions in reaching its conclusions.

3. Utilization and Forecast Reporting

Georgia requests authority to require all carriers to submit utilization data and to audit carriers' use of numbering resources. USTA believes that the long term national structure being developed by the NANC provides for reporting of sensitive details of usage of numbering resources to the NANPA, and will contain conditions for release of such information to state commissions. For that reason, we object to grant of state authority to require direct reporting of usage information to state commissions as being inconsistent with well-settled conditions in the developing national structure. Likewise, because the matter of establishment of fill rates is such a difficult issue, we believe grant of such authority to Georgia should be denied.

Nonetheless, we must observe that the Commission has granted analogous authority to California, New York, and New Hampshire.¹² Indeed, in those grants, we believe that the Commission's own stated concerns would be persuasive that such authority should not be

¹² California Order at 12, New York Order at 12, New Hampshire Order at 9.

granted. We believe that the request should be denied; however, if the Commission does determine that such a grant will be made in this case as well, we urge that the cautions and conditions stated in the California and New York grants be maintained.

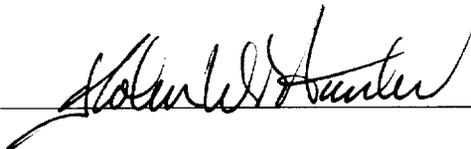

In addition, the Georgia request includes grant of authority that goes beyond efforts of the Commission and NANPA. At the very least, any such additional efforts must be carefully specified before they could be given any valid consideration. Such ill-defined requests for authority in such a sensitive matter must be denied.

Conclusion

USTA urges the Commission to deny Georgia's request for the reasons stated above and those in its previous comments and reply comments in CC Docket No. 99-200 and in its previous comments and reply comments to similar petitions by other states.
