

I fully support, and adopt as my own, the Wormser, Adsit, and Dinelli Petition for Reconsideration on FCC 99-412 in its entirety.

Not too long ago I became a Technician Plus amateur, and was on my way to become a General the right way, not the lazy mans' way. I have finally made it onto the high frequency bands, and in doing so, I have been enjoying my contacts with other countries. I have found amateurs in these foreign countries appalled with the FCC's new rules and regulations as pertaining to 99-412, and cannot see how we as United States citizens can hold our heads high any longer in Amateur Radio!

I respectfully request the Commission adopt the Wormser, Adsit, and Dinelli Petition for partial reconsideration, so we as American operators, can still hold our heads high.

Respectfully,

Joanna Ciprian, K5SLY
