DOCKET FILE COPY ORIGINAL

Subject: SBC Communications, Inc. application to provide long distance service in Texas

Dear Ms. Roman Salas:

It is my desire to express our appreciation for the professional and quality service that the SBC Wholesale Account team has provided.

We did experience some problems getting the OSS setup but the SBC IS group was very helpful and promptly made the necessary corrections to bring us on-line. We struggled to process our first few orders due to errors on our part but the LSC group was very patient with us. They had to research some of our questions but followed up with a return call every time.

With the access to the OSS, IS, LSC, residential and business lines we have been able to successfully compete in the local market and add new customers.

It is our experience that SBC has been cooperative in opening up the local market to new CLEC's such as ours. As such, we fully support SBC's FCC request to be allowed to compete in the Texas long distance market.

Chuck N. Salas
