Washington, D.C. 20554

Hello,

I have been informed that there is a petition to remove the 155-mile distance limit from the 11-meter CB band. I encourage you, the FCC, to remove this rule as it is literally unenforceable and has no reason to it. It would make many operators using the CB service happy, as conditions allow for accidental long-distance communications on a nearly daily basis. As far as my friends, fellow CB operators, and I see, there is no use in keeping this rule. Please consider removing the 155 mile distance limit, we believe it would be the right thing to do.

Sincerely,  
Fabian Carbone, KD5JDG
