**Subject:** Amateur Radio Changes are Dumb

I just read the proposal for April 15 ,2000 for Amateur Radio. Have you guys gone loco? 5 WPM is no discipline to have access to the High Frequencies. You are going to create a rats nest the likes of which will bring back the days of 1974 where you lost control of the Citizens Band. Where is your head and what are you thinking? I can not imagine the benefit to ham radio of lowering the requirements to such a low level. How far down can you dumb it? Anyway, don't think that you will hear the end of this. It is stupid what you are doing and I said it. Incredible, you will lose control of the spectrum with this ruling. By the way, ham radios work very well on other frequencies and generate harmonics. Duhhhhh  
Anyway, enough said, I don't know what you are trying to fix but I think you forgot to that you are trying to drain the swamp and your gonna find your self up to your butt in alligators.  
73,  
Mike K7CF
