RE: REQUEST FOR PHASE I WIRELESS E9-1-1 SERVICE

Dear Mr. Dukes:

On behalf of the Commission on State Emergency Communications (CSEC), please know that we appreciate your company's participation in our efforts to implement Phase I Wireless E9-1-1 service in accordance with FCC rules. Through the process of responding to the Wireless Service Provider Survey, attending the planning meetings in Austin, and participating in the follow-up conference calls, the CSEC and the Wireless Service Provider community have made great strides toward providing enhanced 9-1-1 service to wireless callers in Texas. Much has been accomplished, however, there is much more work to be done.

As authorized in Texas Health and Safety Code, Chapter 771.051, the CSEC is the state's authority on emergency communications, and is responsible for the oversight and implementation of 9-1-1 service throughout the state's 9-1-1 program area. The state program is implemented through a partnership with the state's twenty-four Regional Planning Councils (RPCs). As described in Health and Safety Code, Chapter 771, the CSEC is the oversight and funding agency for the 9-1-1 programs administered by the RPCs. Acting in this capacity, the CSEC is directly placing the orders for Phase I Wireless E9-1-1 service on behalf of all of the RPCs of Texas. This letter serves as the CSEC's formal request for your company to that service. We request that you provide written acknowledgement of this request upon your receipt of this letter as a matter of public record.

The CSEC requests that Phase I Wireless E9-1-1 service be fully implemented in the following Regional Planning Councils (RPCs), or Councils of Governments (COGs), and related counties no later than April 15, 1999.

CERTIFIED MAIL

October 12, 1999

Robbie Allen
Assistant Manager
Texas RSA 7B3
dba Peoples Cellular
P. O. Box 1206
Quitman, TX 75783

RE: REQUEST FOR PHASE I WIRELESS E9-1-1 SERVICE

Dear Mr. Allen:

On behalf of the Commission on State Emergency Communications (CSEC), please know that we appreciate your company's participation in our efforts to implement Phase I Wireless E9-1-1 service in accordance with FCC rules. Through the process of responding to the Wireless Service Provider Survey, attending the planning meetings in Austin, and participating in the follow-up conference calls, the CSEC and the Wireless Service Provider community have made great strides toward providing enhanced 9-1-1 service to wireless callers in Texas. Much has been accomplished, however, there is much more work to be done.

As authorized in Texas Health and Safety Code, Chapter 771.051, the CSEC is the state's authority on emergency communications, and is responsible for the oversight and implementation of 9-1-1 service throughout the state's 9-1-1 program area. The state program is implemented through a partnership with the state's twenty-four Regional Planning Councils (RPCs). As described in Health and Safety Code, Chapter 771, the CSEC is the oversight and funding agency for the 9-1-1 programs administered by the RPCs. Acting in this capacity, the CSEC is directly placing the orders for Phase I Wireless E9-1-1 service on behalf of all of the RPCs of Texas. This letter serves as the CSEC's formal request for your company to that service. We request that you provide written acknowledgement of this request upon your receipt of this letter as a matter of public record.

The CSEC requests that Phase I Wireless E9-1-1 service be fully implemented in the following Regional Planning Councils (RPCs), or Councils of Governments (COGs), and related counties no later than April 15, 1999.

- East Texas Council of Governments

Rains County
Wood County

We request that you complete the standard Phase I E9-1-1 Service Agreement, provided to you by the CSEC, for each individual COG indicated above. The agreement should be complete, with a detailed cost model attached for our review. The completed contract, in duplicate originals, should be sent to CSEC offices no later than November 1, 1999. The CSEC will coordinate the execution of the contracts with each individual COG, and will subsequently return one of the fully executed originals to your company. We request that you do not contact the COGs until the contracts are fully executed. We will notify both parties, COGs and Wireless Service Providers, when the contracts are executed and implementation can begin. Upon notification, the Wireless Service Provider will be requested to work directly with the COGs in implementing service.

It is important that each carrier provide the CSEC with a cost model that includes costs by specific components such as trunking, database, SCP functionality, and other related costs. It is incumbent upon the CSEC to review all costs to ensure that we procure services that provide the best value, and avoid cost and service duplication. As you are aware, the CSEC has procured the services of SCC Communications to provide SCP services and wireless database services to the state program at a negotiated contract price. Wireless Service Providers are under no obligation to utilize all of these services. However, since some of these services, specifically the SCP function, may be provided to the Wireless Service Provider by other sources, the CSEC has the responsibility to closely examine all costs to avoid any possible cost duplication and to ensure that the State program receives the best possible comparative value. A complete and detailed cost model is essential in making this determination.

The CSEC wishes to assist the Wireless Service Providers in facilitating the successful implementation of wireless E9-1-1 service as much as possible. In order that we may better assist you in this matter, please provide the CSEC with a written list of any needed information with your contract submission. The CSEC will make every effort to expedite these requests to provide the information to you as soon as possible.

In summary, the CSEC requests that you respond to this request through the following correspondence:

- Written acknowledgement of this Phase I request letter, upon receipt
- Phase I E9-1-1 Service Agreement, complete and submitted in duplicate originals, no later than November, 1, 1999
- Detailed Cost Model, in conjunction with contract submission, no later than November, 1, 1999

CSEC Letter
October 12, 1999

RE: REQUEST FOR PHASE I WIRELESS E9-1-1 SERVICE

Dear Ms. Tanner:

On behalf of the Commission on State Emergency Communications (CSEC), thank you for your response to request for wireless carrier information. Please know that we appreciate your company's participation in our efforts to implement Phase I Wireless E9-1-1 service in accordance with FCC rules.

As authorized in Texas Health and Safety Code, Chapter 771.051, the CSEC is the state's authority on emergency communications, and is responsible for the oversight and implementation of 9-1-1 service throughout the state's 9-1-1 program area. The state program is implemented through a partnership with the state's twenty-four Regional Planning Councils (RPCs). As described in Health and Safety Code, Chapter 771, the CSEC is the oversight and funding agency for the 9-1-1 programs administered by the RPCs. Acting in this capacity, the CSEC is directly placing the orders for Phase I Wireless E9-1-1 service on behalf of all of the RPCs of Texas. This letter serves as the CSEC's formal request for your company for that service. We request that you provide written acknowledgement of this request upon your receipt of this letter as a matter of public record.

The CSEC requests that Phase I Wireless E9-1-1 service be fully implemented in the following Regional Planning Councils (RPCs), or Councils of Governments (COGs), and related counties no later than July 28, 2000.

(County Level 9-1-1 Network Diagrams are available on CSEC web site)

We request that you complete the standard Phase I E9-1-1 Service Agreement and Amendment (available on the CSEC web site at www.911.state.tx.us) for each individual COG indicated above. The agreement should be complete, with a detailed cost model and schematic diagrams attached for our review. The completed contract and amendment should be sent to CSEC offices, in duplicate originals, no later than February 18, 2000. The CSEC will coordinate the execution of the contracts with each individual COG, and will subsequently return one of the fully executed originals to your company. We will notify both parties, COGs and Wireless Service Providers, when the contracts are executed.

It is important that each carrier provide the CSEC with a cost model that includes costs by specific components such as trunking, database, SCP functionality, and other related costs. It is incumbent upon the CSEC to review all costs to ensure that we procure services that provide the best value, and avoid cost and service duplication. As you are aware, the CSEC has procured the services of SCC Communications to provide SCP services and wireless database services to the state program at a negotiated contract price. Wireless Service Providers are under no obligation to utilize all of these services. However, since some of these services, specifically the SCP function, may be provided to the Wireless Service Provider by other sources, the CSEC has the responsibility to closely examine all costs to avoid any possible cost duplication and to ensure that the State program receives the best possible comparative value. A complete and detailed cost model is essential in making this determination.

The CSEC wishes to assist the Wireless Service Providers in facilitating the successful implementation of wireless E9-1-1 service as much as possible. Enclosed you will find information regarding the COGs and Counties in which you have a presence, the PSAP name, Network Provider, as well as Selective Router name and type, to assist you in planning your wireless implementation. In order that we may further assist you in this matter, please provide the CSEC with a written list of any needed information with your contract submission. The CSEC will make every effort to expedite these requests to provide the information to you as soon as possible.

The CSEC encourages you to begin all necessary activities immediately in order for your company to deploy Phase I service by the above noted implementation due date. As the CSEC's 9-1-1 database services provider, SCC Communications is providing project management support to the wireless implementation project and will be providing you with information on processes, procedures and data packets for each of the COGs identified in this letter.

In summary, the CSEC requests that you respond to this request through the following correspondence:

- Written acknowledgement of this Phase I request letter, upon receipt
- Phase I E9-1-1 Service Agreement, and Amendment, completed and submitted in duplicate originals, for each Council of Government indicated above, no later than February 18, 2000
- Detailed Cost Model, in conjunction with contract submission, no later than February 18, 2000
- Schematic Diagrams reflecting the connectivity of the WSP's MSCs to the existing 9-1-1 network
- Written request for additional information, in conjunction with contract submission, no later than February 18, 2000
