EX PARTE OR LATE FILED

Dear Mr. Einhorn:

RE: Application by Verizon New England Inc., et al., for Authorization to Provide In-Region, InterLATA Services in Massachusetts, Docket No. 00-176

In response to questions from staff, Verizon has examined the data for Carrier-to-Carrier measurements PR-4-04 and PR-4-05 (Percent Missed Appointments – Dispatch and No Dispatch, respectively) for unbundled xDSL loops. We discovered that performance for all unbundled xDSL loops was aggregated in the reported results for PR-4-04, whether or not the orders required a dispatch.

We have sorted the data into the correct categories for the months of May through October. The disaggregated results and observations are as follows:

	May	June	July	Aug.	Sept.	Oct.
PR-4-04						
% missed	3.82	3.99	4.06	43.11	12.73	3.76
Observs.	1492	1804	1428	1095	2192	1941
PR-4-05						
% missed	0.00	0.00	0.32	0.22	3.44	0.58
Observs.	272	223	308	462	1367	521

If you have any questions, please do not hesitate to call me.

Sincerely,

cc: S. Pie
