FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

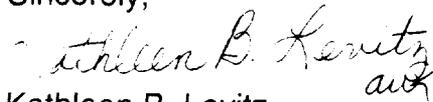

Re: CC Docket No. 98-147  
CC Docket No. 96-98

Dear Ms. Salas:

On January 16, 2001, Tommy Williams, Steve Earnest, Debbie Ogle, and I, representing BellSouth Corporation, met with Jordan Goldstein, Legal Advisor to Commissioner Ness, and Rebecca Beynon, Legal Advisor to Commissioner Furchtgott-Roth, to discuss the terms and conditions under which incumbent local exchange carriers should be required to facilitate line splitting. The attached document formed the basis for those presentations.

In compliance with the Commission's rules, I am filing two copies of this notice for each of the proceeding identified above and ask that you associate these filings with those proceedings.

Sincerely,

  
Kathleen B. Levitz

Rebecca Beynon

**BellSouth Ex Parte**

**CC Docket No. 98-147**

**January 16, 2001**

# Line Sharing vs. Line Splitting

## ➤ **Line Sharing**

- Defined by Commission in Third Report and Order (CC Docket No. 98-147)
- Defined as the provision of xDSL-based service by a competitive LEC and voiceband service by an incumbent LEC on the same loop

## ➤ **Line Splitting**

- Defined by Commission in SBC Texas 271 Order
- Defined as the situation where both the voice and data service are provided by competing carriers over a single loop

## ➤ **UNE-P**

- Loop and port combination where the ILEC is not the voice provider

# Line Splitting

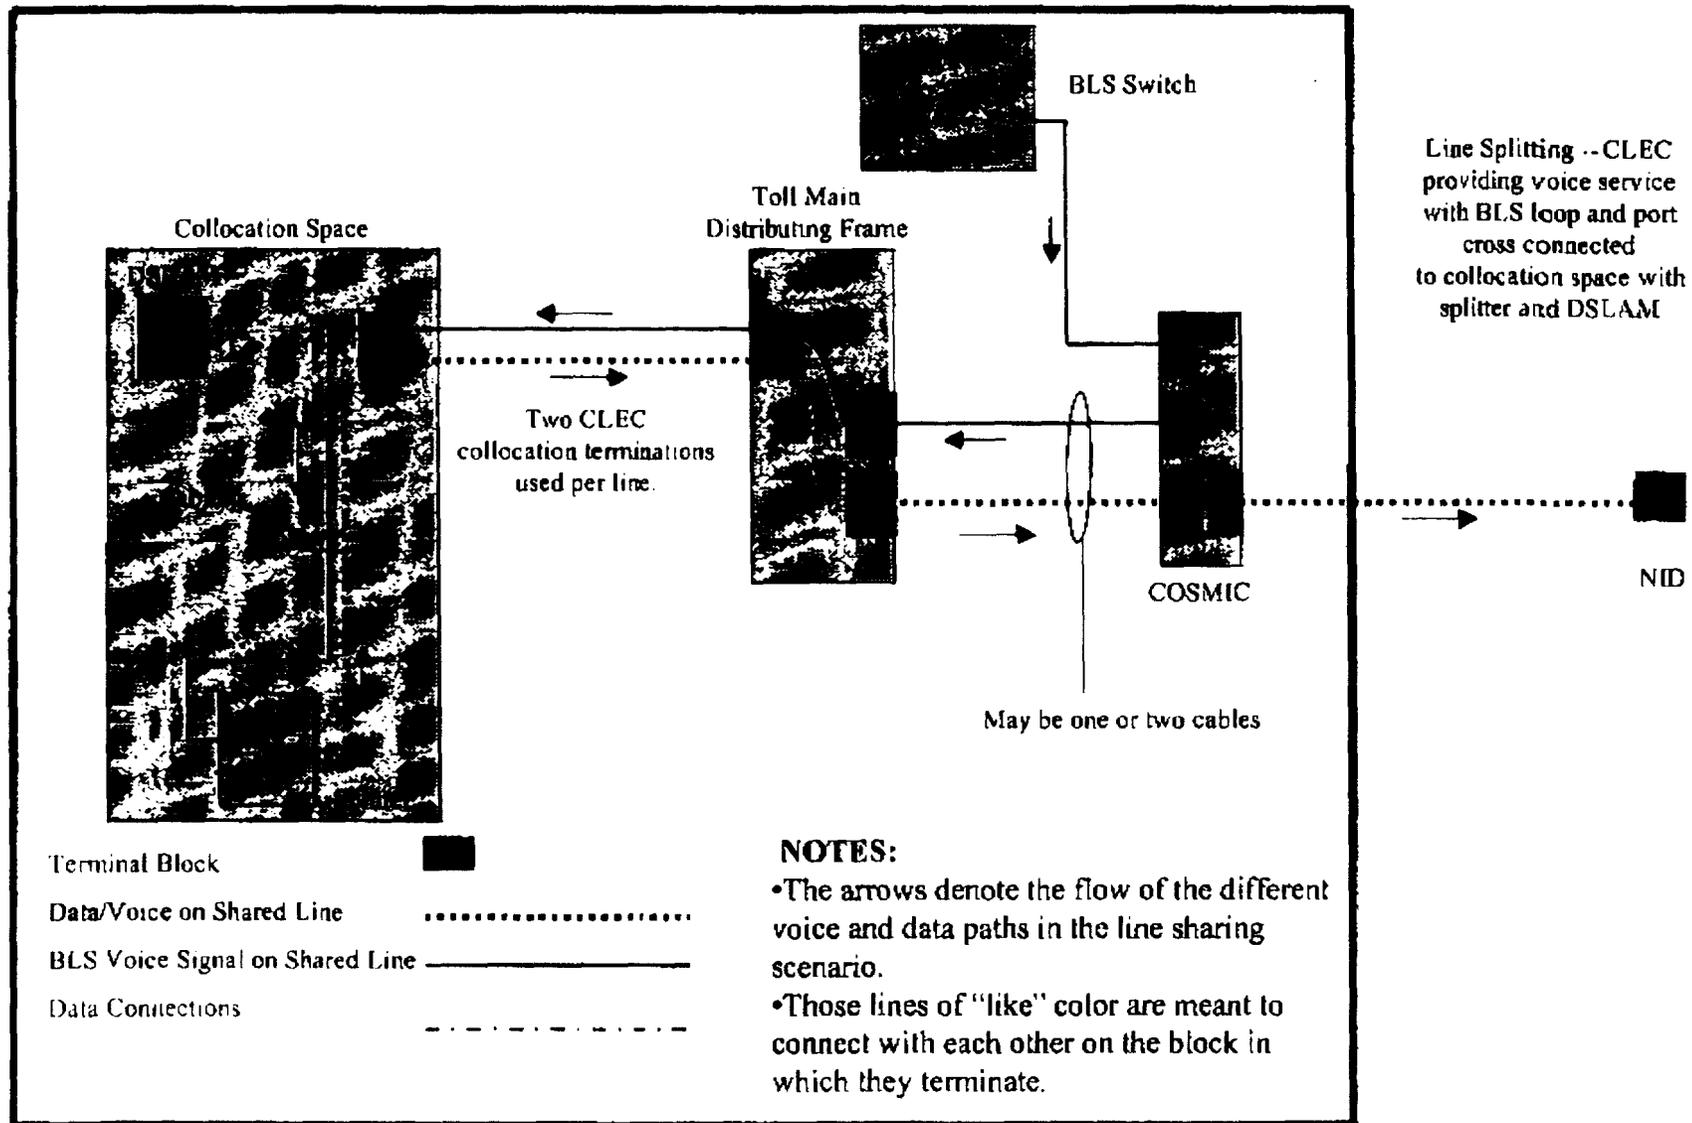

- **BellSouth is willing to facilitate line splitting between a voice CLEC and a data CLEC**
  - Allows CLEC to provide customers bundled voice and data services
  - BellSouth has established a project team for line splitting and is beginning to develop the option
  
- **Splitter must be owned by one of the CLECs**
  - BellSouth will cross-connect a loop and port to the collocation space of either the voice CLEC or the data CLEC
  - Commission stated in the SBC Texas 271 Order that incumbent LECs have an obligation to permit competing carriers to engage in line splitting over the UNE loop *where the competing carrier purchases the entire loop and provides its own splitter*

# Line Splitting

- **BellSouth will have only one customer of record**
  - Only one CLEC should be the point of contact for ordering, maintenance, and repair issues. The UNE loop entitles the CLEC to the entire spectrum
  
- **Splitter is not part of the loop**
  - Splitters were never part of BellSouth's network. The splitter functionality is provided by the DSLAM for BellSouth's ADSL service
  - There is no requirement to unbundle the DSLAM
  
- **No longer have a UNE-P once a splitter is installed**
  - UNE-P involves only a loop and port. Converting a customer to UNE-P involves no central office wiring.
