``@``Tb``~``pÿ•~I am a late-deafened person who has been using hearing equipment for over 49 years. I've used FM listening equipment for nearly the past 15 years. I carry with me a Phonak hearing aid with the MicroLink Miniature FM receiver/transmitter, and I also have a Williams Sound Personal Listening System, which I've used for nearly 10 years. These I use at meetings, social events, and other places where I need to understand the dialogue of the group I am with. You can see that I am reliant on FM band availability to a great degree. There are theaters, houses of worship, public meeting places, and courtrooms, to name a few, which currently use the FM bandwidth for listening equipment. These enable us to access communication under the provisions of the Americans with Disabilities Act.SG``A``~``•``~``^``•``Times New Roman``A•``~``•``^``•``d`1`A

``@``T ^``~`pÿN^I can appreciate the value of having FM bands available for use by persons who benefit from listening equipment, especially youngsters in schools, participants in legal and medical proceedings, lecture and religious events, to name only a few. Please ensure that FM bands are generously available for those of us who cannot hear normally, and rely on technology to be a part of the dialogue whenever there is a group activity. We have an aging population with a higher preponderance for hearing loss at this time, and FM listening equipment will become more of a necessity than ever before.SG``A-
