

Dear Friends: As a hard-of-hearing person who uses his personal assistive listening FM system extensively as well as FM systems in public places, I want to protest the proposed sale of the 216-217 MHz which has been allocated and used for FM systems. In addition to my personal involvement, I am concerned for those children who use FM systems in the classroom.

Please do not reallocate these FM channels. Whatever income this would bring will be at the expense of those who use assistive listening FM systems!
