

EXTREMELY CONCERNED about FCC selling FM Band 16-217MHz. We are parents of hearing impaired 6-year-old child. We purchased our own FM system when she was 18 months old. We used it constantly, the benefits are too numerous to mention here. Her teachers use the FM system throughout her school day. It would be extremely difficult for a hearing impaired child to learn in the classroom without the benefit of FM system. Most deaf and hard of hearing children are mainstreamed or included in the regular classroom. Why handicapp children who already have a disability - by taking away the technology these children NEED to LEARN!!!! I would be happy to discuss this matter in further detail. It is critical to the future of hearing impaired children that this FM Band 16-217MHz be left alone. Thank you.
