

Dear FCC, Please, please do not sell frequency bands 216-217 MHz.
These bands are used for assistive listening devices for those of us with hearing loss. Those without hearing loss take so much for granted, that those of us who are hearing impaired have to struggle with on a daily basis. Many People Use Listening Devices - And AS OUR POPULATION GETS OLDER, MANY MORE PEOPLE WILL NEED THEM.

We, the hearing impaired population, use them in the workplace and to be part of our communities.

PLEASE DON'T TAKE ONE OF OUR VITAL CONNECTIONS TO THE WORLD AWAY FROM US.

Thank You.
