

As a licensed amateur, ARRL member, CBer, and private citizen, I find it quite disturbing that the expressed will of the "constituency" most directly affected by RM-9807 has been ignored. This is contrary to the democratic principles of this country and I am especially concerned that the words of private interest organizations (one of which I belong to) could have swayed the decision negatively. I for one, plan on making my voice heard by my local and congressional representatives re. this matter. You have a chance to reverse a mistake on your part, please seize the opportunity. Rule in favor of RM-9807. My interest in amateur radio would never have been sparked if it were not for DX propagation on the 11 meter band. Please do the right thing by the people, not some private interest groups interested solely in the "core distinction" that supports an aura of superiority. I repeat, RULE IN FAVOR OF RM-9807. Thank you.

Sincerely,

Egbert C. Craig, Jr.
