Re: ET Docket No. 00-258

Dear Chairman Powell:

Bulloch County Schools owns some of the ITFS spectrum. We are exploring the possible ways in which these frequencies can be used to improve the technology in our school district. Cellular phone service for our technical support personnel and bus drivers, radio and television stations, and wireless internet access to support instruction are among the possibilities. We have meetings planned to discuss which of these services supported by ITFS will be more lucrative to our teachers and students.

We are asking that the FCC allow school districts to retain the ITFS spectrum as it is vital to the future of technology in the educational realm.

Thank you for your consideration.
