Re: Texas RSA 1 Limited Partnership dba XIT Cellular  
Carrier Quarterly Reports on Progress of TTY-Digital Deployment  
Solutions  
CC Docket No. 94-102

Dear Ms. Salas:

On April 16, 2001, Texas RSA 1 Limited Partnership dba XIT Cellular ("XIT Cellular") filed its quarterly report on the progress of TTY-digital deployment solutions in accordance with the Commission's *Fourth Report and Order* in the above captioned proceeding,<sup>1</sup> along with a facsimile copy of a Declaration by an authorized company representative attesting to the accuracy of the report.

Enclosed please find the original Declaration to be associated with XIT Cellular's Quarterly Report. Please contact the undersigned with any questions regarding this matter.

Respectfully submitted,

John Kuykendall  
Its Attorney

<sup>1</sup> A facsimile copy of the report prepared by an authorized company representative is attached. A supplemental filing will be made after the original has been received.

**CAPROCK CELLULAR LIMITED PARTNERSHIP  
TTY REPORT  
APRIL 14, 2001**

**1. Network infrastructure software development**

Caprock Cellular utilizes Nortel Networks equipment to provide TDMA digital services in Texas RSA 4. A report from Nortel Networks states that development of software is complete, and product tests have been completed as well. Testing was limited to a Panasonic prototype handset, as other equipment was not available during the test.

**2. Handset development and testing plans**

Caprock Cellular must rely on handset vendors to develop the required handsets. When handsets are available testing can be performed with area PSAPs to insure compatibility.

**3. Beta testing and lab testing**

Caprock Cellular must rely on Nortel Networks and handset vendors for initial conformance testing.

**4. Release and general availability to carriers of network infrastructure software**

Nortel Networks has stated that the required software load, MTX10, will be generally available week 44 of 2001. The exact date of deployment of this software load is not known at this time.

**5. Availability to carriers to full acceptance test units**

Nortel Networks plans to test and confirm the solution performance during the six-month extension allowed for this purpose.

**6. Efforts toward achieving digital wireless solution capability with enhanced TTY devices**

The solution provided by the MTX10 software load addresses Baudot type messages only. Other capabilities may be included later, after standards are adopted.

**7. Carrier coordination of testing with PSAP**

See response to item 2. above.
