

Dear FCC;

I STRONGLY appose any expansion of the current statua of the Verizon/NYNEX system. I have had nothing but grief when dealing with these people, including gettingt just a simple MLT test done. They persistantly drag their feet and wait everyone out until we are tired and give up. I am sure if I subscribed to them for service it would be installed in days. I firmly believe they have much more work to do before being allowed into any other markets.
