Subject: Worldcom Global Relay

To Whom It May Concern:

MCI Worldcom Global Relay over the Internet is simply put, "THE BEST!!!"
It is much more convenient and a lifesaver wherever I go. I could use the Internet and the Global IP Relay anywhere easily!
It is much harder to get to a phone somewhere sometimes, asking if I could use the phone with TDD or must bring TDD with me to a payphone! It is time-consuming.
Using regular relay service on TDD at home is ok, however I am on the Internet almost all the time for work and I could multitask the work at the same time using IP Relay over the Internet which actually saves much time for me!
Internet is everywhere and all over the place at the malls, libraries, etc too. I believe Global IP Relay Service is one of the best revolutionary invention for the deaf on the Internet.
Please support and keep Global IP Relay Service!!!!

Thank you!
Heidi Shipley
