

August 27, 2001

Ms. Magalie Roman Salas, Secretary  
Federal Communications Commission  
The Portals, TW-A325  
445 12<sup>th</sup> Street, S.W.  
Washington, D.C. 20554

Re: Ex Parte Notification: WT Docket No. 00-32 (The 4.9 GHz Band Transferred from Federal Government Use)

WT Docket No. 00-258 (Amendment of Part 2 of the Commission's Rules to Allocate Spectrum Below 3 GHz for Mobile and Fixed Services to Support the Introduction of New Advanced Wireless Services, including Third Generation Wireless Systems)

CC Docket No. 94-102 (Revision of the Commission's Rules to Ensure Compatibility with Enhanced 911 Emergency Calling Systems)

Dear Ms. Salas:

Enclosed please find *ex parte* notification for three different dockets concerning an August 24, 2001 meeting between Richard Barth, Vice President and Director, Telecommunications Strategy and Tom Sugrue, Chief, Wireless Telecommunications Bureau.

At this meeting, Dr. Barth discussed the importance of a quick resolution of the Commission's rule making proceeding to allocate the spectrum found at 4.94 – 4.99 GHz. Mr. Barth noted that many individual public safety organizations and all of the major associations representing public safety have strongly recommended that the Commission allocate this spectrum to public safety for the provision of broadband wireless services. Motorola would like a quick resolution of the issue so that it can expeditiously provide public safety with the life-saving equipment in this spectrum. Motorola stated that it strongly supports the public safety community in its effort to obtain allocation of this spectrum and urged allocation be made to public safety as soon as possible, preferably not later than the agenda meeting of October 2001.

Dr. Barth also noted that Motorola hopes for an early and comprehensive U.S. Government decision on spectrum for advanced wireless services, rather than a piecemeal set of decisions by various agencies that would leave industry unable to plan for effective and competitive service delivery.

Finally, Motorola noted the ongoing difficulties of implementing the Commission's E911 requirements, as we have consistently noted to the Commission for many years. Motorola noted its expectation that it would meet the ultimate goals of the E911 proceeding, but that interim accommodation to what is achievable would require waivers.

Please contact Rich Barth at (202) 371-6959 regarding any questions concerning this matter.

Respectfully Submitted,

By: **Mary Brooner** \_\_\_\_\_
