CC Docket 94-102

Michael K. Powell  
Federal Communications Commission  
445 12th St. S.W.  
Washington, DC 20554

EX PARTE OR LATE FILED

Chairman Powell:

As a concerned and interested American who has required the use of his wireless phone on a number of occasions to report emergencies on the road I must say that having a central operator who knew my location would have been very helpful in several instances. To extend the E-911 deadline for locating a wireless phone when the location technology seems to exist will be detrimental to the safety of many Americans in my opinion, the cost of which would seem easy to recoup. Please consider this e-mail as a request not to extend the deadline that many carriers are requesting so that we can help make our roads a safer place.

Thank you very much for your consideration of my request.
