Re: In the Matter of Reallocation of the 216-220 MHz Government Transfer Band:
ET Docket No. 00-221

Dear Ms. Salas:

This in reference to the Commission's invitation for public comment on the possibility of allowing new, high-powered uses of the band 216-220 MHz and the related notion that the band 216-217 MHz be auctioned.

The Santa Rosa County Sheriff's Office currently uses law enforcement tracking equipment in this frequency band. We have been very pleased with the results we have achieved with this technology.

In particular, use of this equipment has made a dramatic contribution to the apprehension and conviction of criminals and to a reduction in the crime rates. It has proven invaluable in the rapid recovery of stolen money and property. Furthermore, all the criminals apprehended through use of the tracking equipment were convicted of their crimes and removed from the community. Their subsequent crimes were prevented. And the time and cost of investigation were prevented.

The Santa Rosa County Sheriff's Office urges that the Commission not allow new, high-powered users in the band or an auction of the segment 216-217 MHz. We urge the Commission to preserve the band for interference-free law enforcement communications.

Sincerely,

Wendell Hall
Sheriff

Dear Ms. Salas:

This is in reference to the Commission's invitation for public comment on the possibility of allowing new, high-power uses of the band 216-220 MHz and the related notion that the band 216-217 MHz be auctioned.

The Clinton Police Department currently uses law enforcement tracking equipment in this frequency band. We have been very pleased with the results we have achieved with this technology.

In particular, use of this equipment has made a dramatic contribution to the apprehension of criminals and to a reduction in crime rates. It has proven invaluable in the rapid recovery of stolen money and property.

The Clinton Police Department urges that the Commission not allow new, high-power users in the band or an auction of the segment 216-217 MHz. We urge the Commission to preserve the band for interference-free law enforcement communications.

Sincerely,

Michael Gill
Patrol Division Captain

RE: Reallocation of the 216-220 MHz Government Transfer Band: ET
Docket No. 00-221

Dear Ms. Salas:

I am writing in response to the Commission's request for public comment regarding the possibility of allowing new, high-power uses of the 216-220 MHz band and the related suggestion that access to this band be auctioned. The Gresham Police Department currently uses tracking equipment that utilizes this band and we have been very please with the results we have achieved with this technology.

Use of this tracking equipment enables us to more quickly apprehend suspects, recover stolen money and property, and increases our conviction rate for these types of crimes. These convictions in turn positively affect our overall crime rate and recidivism rate. Another benefit of using this equipment is its use decreasing the time needed to complete our investigations.

As Chief of Police I strongly urge the Commission to preserve the band for interference-free law enforcement communications. It will not serve the best interests of my community, or the other communities served by this band, to allow new, high-power users access to the 216-217 MHz segment and to auction its use.

Sincerely,

Bernie Glusto
Chief of Police

Re: In the Matter of Reallocation of the 216-220 MHz Government Transfer Band:
ET Docket No. 00-221

Dear Ms. Salas:

This is in reference to the Commission's invitation for public comment on the possibility of allowing new, high-power uses of the band 216-220 MHz and the related notion that the band 216-217 MHz be auctioned.

The Tustin Police Department currently uses law enforcement tracking equipment in this frequency band. We have been very pleased with the results we have achieved with this technology.

In particular, use of this equipment has made a dramatic contribution to the apprehension and conviction of criminals, and to a reduction in crime rates. It has proven invaluable in the rapid recovery of stolen money and property. Furthermore, all the criminals apprehended through use of the tracking equipment were convicted of their crimes and removed from the community. Their subsequent crimes were prevented. And the time and cost of investigation were prevented.

The Tustin Police Department urges that the Commission not allow new, high-power users in the band or an auction of the segment 216-217 MHz. We urge the Commission to preserve the band for interference-free enforcement communications.

Sincerely,

Steve Foster

Re: In the Matter of Reallocation of the 216-220 MHz Government Transfer Band:
ET Docket No. 00-221 ✓

Dear Ms. Salas:

This letter is written in support of law enforcement maintaining the 216-217 MHz band. Electronic tracking systems operate within this frequency range and are an excellent law enforcement tool. We have captured bank bandits as a result of the ETS Tracking System. If this frequency band is auctioned, law enforcement, and the protection of the community, will suffer.

The Fullerton Police Department requests that the Commission not allow the auction of the 216-217 MHz. The band needs to be preserved, interference-free, for specialized law enforcement communications.

With best regards,

PATRICK E. MCKINLEY
Chief of Police
