Re: Revisions of the Commission's Rules To Ensure Compatibility with
Enhanced 911 Emergency Calling Systems- CC Docket No. 94-102
Choice Wireless, LC
TTY Quarterly Report - Third Quarter 2001

Dear Ms. Salas:

Transmitted herewith, on behalf of Choice Wireless, LC, is its carrier quarterly report on the progress of TTY-digital deployment solutions pursuant to the Commission's *Fourth Report and Order* in this proceeding (CC Docket No. 94-102).

If you have any questions regarding this matter, please contact the undersigned.

Choice Wireless, LC

TTY REPORT

October 10, 2001

The following information is based on representations made to Choice Wireless, LC ("Choice") by its vendors. Choice does not have the ability to independently verify these release dates. Choice is completely reliant upon its vendors to implement the TTY solution in its handsets and network.

1. Network infrastructure software development

Tecore, our switch manufacturer and AirNet our infrastructure manufacturer are aware of TTY requirements. Software compliance is under evaluation at this time. Choice is dependent upon a solution being made available by the infrastructure vendors.

2. Handset development and testing plans

At this point we are working with handset manufacturers to validate a solution for deployment in our network by the date tentatively set by the FCC.

The absence of a firm commitment by manufacturers of TTY compatibility for PCS handsets remains a major concern for Choice to provide appropriate handsets and support the 12-31-01 FCC mandated deadline.

We have and will continue to work with our handset vendors to ensure TTY access to E911 for our consumers.

3. Beta testing and lab testing

Choice will begin testing TTY compatible equipment dependent upon solutions provided by network infrastructure and handset vendors.

4. Release and general availability to carriers of network Infrastructure software

Choice is awaiting updated reports of software availability from switching and infrastructure vendors.

5. Availability to carriers of full acceptance test units

Choice is awaiting software and hardware availability from switching, infrastructure, and handset vendors.

6. Efforts toward achieving digital wireless solution compatibility with enhanced TTY devices

Choice remains dependent upon the availability of vendor provided

solutions to meet the FCC's tentative mandated timeline (12-31-01) to provide E911 TTY access to our networks.

We expect the GSM functional performance to be similar to the other technologies and meet or exceed all of the TTY Forum's Consumer Group requirements.

Much work will need to be done to implement the GSM solution in our networks over the next year.

7. Carrier coordination of testing with PSAP

See Response to No. 2 above.

8. Carrier testing activities, including field testing, consumer end-to-end testing, and other necessary tests

Testing will begin immediately upon receipt of software and hardware. Choice is dependent upon network infrastructure vendor solutions.

9. Retail availability of necessary consumer equipments

Choice is dependent upon the availability of handsets from vendors. No firm commitment has been received at this time from handset vendors.

10. Geographic scope of network infrastructure deployment

Choice service areas – Ardmore, OK Mkt. No. B19, Sherman, TX Mkt. No. B418, Wichita Falls, TX Mkt. No. B473, Lawton, OK Mkt. No. B248

Respectfully Submitted

Alvin M. Fuhrman
President, Choice Wireless, LC
