

I have noticed a decline in the quality of news in recent years, which I would directly relate to media monopolies. This is a dangerous trend for any democracy, for a healthy democracy depends on citizen access to a diversity of ideas and information. Totalitarian governments, communism---their goal is to limit news sources. This proposal before the FCC is in direct opposition to our core values as a nation!
And in times like these, the quality of news sources should be understood to be of paramount importance.
